

What Does This System Do?

- 1 Pulls contract data from Speed ERP**
automatically every morning at 4 AM, or when you upload a file
- 2 Shows you who needs follow-up**
overdue contracts, pending calls, outstanding payments — all in one view
- 3 Lets you track every action**
mark calls, record outcomes (Extended, Returning, Closed, Immobilised)
- 4 Sends WhatsApp reminders**
one-click customer reminders via GallaBox WhatsApp Business
- 5 Gives you real-time KPIs**
charts, contact rates, resolution rates, outstanding amounts

Who Uses It?

Daily Workflow — How It Works Every Day

How Data Moves Through the System

3 Ways Contract Data Enters the Dashboard

What Happens to the Data

Important:

When data is refreshed, all your previous work (call notes, WhatsApp status, resolutions) is preserved. Nothing is lost.

Dashboard Views & What You Can Do

1. Overview (Home Screen)

- Total contracts count with due today & overdue breakdown
- Total outstanding receivables in AED
- Contact rate — what % of customers have been called
- Resolution rate — what % of contracts have an outcome
- Resolution chart — donut showing Extended / Returning / Closed / Immobilised
- Contact chart — bar chart showing Called / No Answer / Callback / Pending
- Needs Attention — top 5 most overdue contracts that need action

2. Contracts (Work Screen)

- Status cards at top — click any card to filter (Due Today, Overdue, Called, Not Called, etc.)
- Search by customer name, agreement number, or phone number
- Filter by category, call status, or resolution
- Full table with: Customer, Phone, Vehicle, Status, Days Overdue, Outstanding
- Phone number is clickable — tap to call directly from your phone
- 3-dot menu on each row for quick actions (Call / WhatsApp / Resolution)
- Click customer name to expand and see email, sales person, branch, dates, notes

3. Upload (Import Screen)

- Select category: Due To Close Today or Over Due Closing
- Drag and drop Excel (.xlsx) or CSV file
- Download sample CSV to see the expected format
- System shows how many rows were new vs. updated

Quick Actions Reference

Action	What It Does	When To Use
Mark Called	Records that you spoke with the customer	After a successful phone call
Mark No Answer	Records that the phone was not answered	After an unanswered call
Mark Callback	Flags for a follow-up call later	Customer asked to call back
Send WhatsApp	Sends a template reminder via WhatsApp	Customer not reachable by phone
Set Extended	Contract has been renewed/extended	Customer confirmed extension

System Connections & Access

Speed Auto Systems (ERP)

legenduae.speedautosystems.com

Where all rental agreements, vehicle data, and customer info lives

Connection: Daily automatic pull at 4 AM + manual upload

AR Command Center (Dashboard)

legend-ar-dashboard.vercel.app

Where the AR team works — views contracts, makes calls, tracks progress

Connection: Open in any browser, works on desktop and mobile

Supabase (Database)

[Cloud-hosted PostgreSQL database](#)

Stores all contract data, call logs, action history safely in the cloud

Connection: Connected automatically — no login needed

GallaBox (WhatsApp)

server.gallabox.com

Sends WhatsApp Business messages to customers using approved templates

Connection: Triggered from Dashboard when you click 'Send WhatsApp'

Vercel (Hosting)

vercel.com

Hosts the Dashboard website and runs the daily 4 AM data scraper

Connection: Auto-deploys when code is updated on GitHub
